**DISCRETE
MATHEMATICS**

Author index to volume 144 (1995)

Aigner, M., E. Triesch and Z. Tuza, Searching for acyclic orientations of graphs	(1-3) 3- 10
Erdős, P.L., U. Faigle and W. Kern, On the average rank of LYM-sets	(1-3) 11- 22
Faigle, U., see P.L. Erdős	(1-3) 11- 22
Felsner, S. and W.T. Trotter, Colorings of diagrams of interval orders and α -sequences of sets	(1-3) 23- 31
Griggs, J.R., Matchings, cutsets, and chain partitions in graded posets	(1-3) 33- 46
Kern, W., see P.L. Erdős	(1-3) 11- 22
Kierstead, H.A. and J. Qin, Coloring interval graphs with First-Fit	(1-3) 47- 57
Liu, W.-P., I. Rival and N. Zaguia, Automorphisms, Isotone self-maps and cycle-free orders	(1-3) 59- 66
Madej, T. and D.B. West, Interval number of special posets and random posets	(1-3) 67- 74
Mitas, J., Interval orders based on arbitrary ordered sets	(1-3) 75- 95
Qin, J., see H.A. Kierstead	(1-3) 47- 57
Rival, I., see W.-P. Liu	(1-3) 59- 66
Strahinger, S., Dimensionality of ordinal structures	(1-3) 97-117
Syslo, M.M., The jump number problem on interval orders: A $3/2$ approximation algorithm	(1-3) 119-130
Triesch, E., see M. Aigner	(1-3) 3- 10
Trotter, W.T., see S. Felsner	(1-3) 23- 31
Tuza, Z., see M. Aigner	(1-3) 3- 10
West, D.B., see T. Madej	(1-3) 67- 74
Zaguia, N., see W.-P. Liu	(1-3) 59- 66
